CLEANING INSTRUCTIONS

1. Wash all breast pump parts immediately after use to maintain hygiene.
2. Sterilize parts that come in contact with milk using steam or boil for no more than 3 minutes.
3. Avoid sharp brushes to prevent damage to pump components.
4. Sterilize silicone or rubber parts, such as the duckbill valve and cushion, in hot water for 1 minute.

SAFETY INSTRUCTIONS

1. Inspect all parts for cracks, chips, or wear before each use. Replace any damaged components immediately.
2. This is a personal care product and should not be shared with others.
3. Do not wash the motor or expose it to water.

TECHNICAL SPECIFICATIONS

1. Input: 100-240 Vac, 50-60Hz, 1-2A

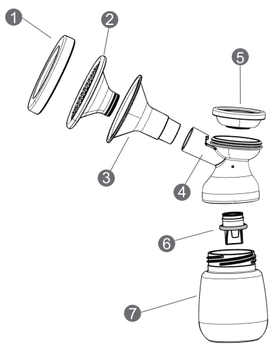
FIRST FEED NEXA

Effortless Pumping, Endless Love

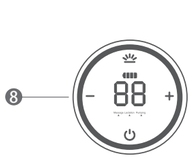
Installation & User Manual

Read the instructions carefully before using the Breast Pump and keep this manual for future reference.

CONTENTS



1. Hygiene Cover
2. Silicone Cushion
3. Bell Mouth
4. Pump Body
5. Silicone Diaphragm
6. Duckbill Valve
7. Milk collector
8. Pump Motor
9. USB Cable



INSTALLATION STEPS

Step 1. Attach the duckbill valve to the bottom of pump body.

Step 2. Screw the milk collector onto the pump body.

Step 3. Secure the bell mouth to the pump body.

Step 4. Fit the silicone cushion onto the bell mouth firmly.

Step 5. Fix the silicone diaphragm onto the top of the pump body

Step 6. Place the motor on top of the pump body and connect the power adapter.

HOW TO USE

Before Pumping

» Wash hands and ensure your breasts are clean.
» Gently squeeze a small amount of breast milk to stimulate flow.
» Before each use, the breast pump must be cleaned.
» Relax in a comfortable chair, lean forward slightly (use a cushion to support your back.)

While Pumping

Step 1
Place the silicone cushion on your breast with the nipple centred. Keep the breast pump upright.

Step 2
Long press (⏻) to power on.

Step 3
Short press (⏻) to switch to massage mode which will be displayed on the LED screen.

Step 4
Short press (⏻) to switch to lactation mode which will be displayed on the LED screen.

Step 5
Short press (⏻) to switch to pumping mode which will be displayed on the LED screen

Step 6
Adjust suction levels from 1 to 9 with "+" or "-".

Step 7
Long press the light button (☼) for night use.

Step 8
Long press (⏻) to turn off.

Milk Storage

1. Refrigerate milk for up to 48 hours at ~4°C.
2. Leave space in bottles when freezing to allow expansion.
3. Avoid storing milk in the refrigerator door.
4. To preserve nutrients put the milk in the fridge or use a bottle warmer (40°C).
5. Never use a microwave to defrost or heat milk.
6. Use a bottle warmer to warm breast milk
