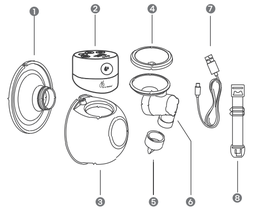
Lactella Flexi

Effortless Pumping, Endless Love

Installation & User Manual

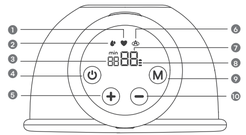
Read the instructions carefully before using the Breast Pump and keep this manual for future reference.

Components



1. Flange (24mm)
2. Pump Motor
3. Milk Collector (180ml)
4. Silicone Diaphragm
5. Duckbill Valve
6. Linker
7. USB Charging Cable
8. Bra Adjustment Buckle

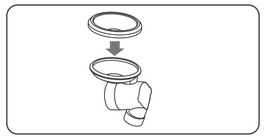
Button Functions



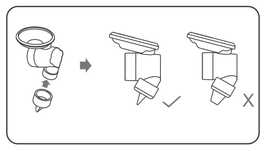
1. **Stimulation Mode:** Prepares breasts for milk flow
2. **Expression Mode:** For active milk extraction
3. **Time Display:** Shows pumping duration
4. **Power Button:** Turns the pump on/off
5. **Level Up Buttons:** Increase the suction level
6. **Automatic Mode:** Alternates between stimulation and expression
7. **Level Display:** Shows current suction level
8. **Power Display:** Indicates battery level
9. **Mode Button:** Switch between modes
10. **Level Down Button:** Decrease the suction level

Installation Guide

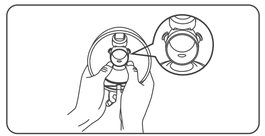
1. Attach the silicone diaphragm to the linker by pressing it into place.



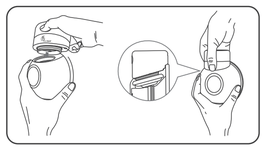
2. Fix the duckbill valve onto the linker securely.



3. Insert the linker into the milk collector, aligning the ear-shaped part with the designated slot.



4. Attach the pump motor to the top of the milk collector and press to secure.



5. Place the flange on the milk collector, aligning the slot on the flange with the slot on the collector.

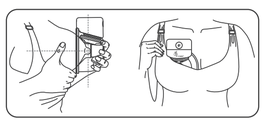
How to Use

Before Pumping

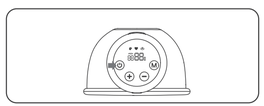
- Wash your hands and clean your breasts.
- The breast pump must be cleaned before each use.
- Ensure all parts are clean and the pump is assembled correctly.
- Sit comfortably with back support.

During Pumping

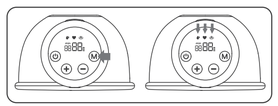
1. Hold the flange firmly against your breast, ensuring the nipple is centered and there are no air gaps.



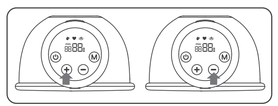
2. Press the Power Button (⏻) to start.



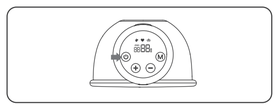
3. Press the button (M) to switch modes once the screen lights up. There are three modes- Stimulation Mode (♥), Expression Mode (✋) and Automatic Mode (♲).



4. Adjust suction level from 1 to 12 using the (+) or (–) buttons.



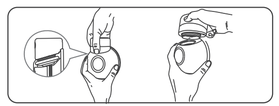
5. Press the Power Button (⏻) again to stop the pump.



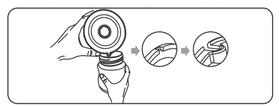
After Pumping

1. Turn off the pump and gently remove it.

2. Detach the motor from the milk collector.

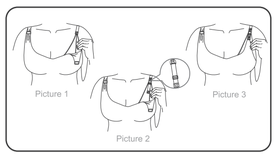


3. Pour collected milk into a storage bottle through the pouring slot. Clean all used parts thoroughly.



Bra Adjustment Buckle

- Adjusts bra strap length for comfort.
- Attach one end hook onto your nursing bra strap, while the other on the bra cup and adjust for a secure fit.



Milk Storage Guidelines

- Use only sterilized pumps to collect milk.
- Do not refreeze previously frozen milk.
- Avoid mixing freshly expressed milk with frozen milk.
- Discard leftover milk after feeding.
- Store in sterilized milk storage bags or bottles:
  - **Refrigerator:** Up to 48 hours
  - **Freezer:** Up to 3 months

Thawing & Heating Stored Milk

- Use a bowl of hot water or a bottle warmer to thaw.
- Do not microwave milk as it causes uneven heating and potential burns.
- Never immerse milk bags directly in boiling water.
- Always check the milk temperature before feeding.

Cleaning Instructions

1. Wash all pump parts immediately after each use.
2. Avoid abrasive brushes to prevent damage.
3. Wipe the motor with a clean, damp cloth (do not submerge in water).
4. Boil parts like the flange, silicone diaphragm, linker, duckbill valve, and milk collector for 5 minutes before first use.
5. After each use, wash these parts with mild soap and clean water.

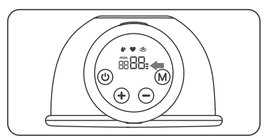
Safety Instructions

1. Check parts regularly for damage and replace if needed
2. Handle the duckbill valve with care; do not insert objects inside it.
3. Do not share the pump; it is for individual use only.
4. Keep the motor dry and away from water.

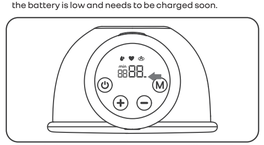
Battery Instructions

Specifications	
Battery	1000mAh
Power Input	DC5V1A
Power	4W
USB	Type C
Charging Time	2 hours
Usage Time	80 minutes
Shut Off	30 minutes auto shut off

- When the battery is fully charged, the display will show three solid bars.



- While using the pump, if only one bar is left and it's flashing, the battery is low and needs to be charged soon.



Note: The breast pump will not operate while charging.

Best Way to use

Comfortable Sitting Position
